Election/Restrictions

Applicant's election of Group III in the Paper on 12/29/03 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 23-33 and 41-61 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Moore (US 2001/0029152 A1).

Moore discloses a method for controlling a chemical mechanical polishing process comprises gathering electrical resistance information and analyzing to control the CMP process (paragraph [0055]-[0056] and also [0044-46, 48-49]).

Response to Arguments

Applicant's arguments filed 12/29/03 have been fully considered but they are not persuasive. Applicant argues that Moore fails to disclose an electrical resistance member. However, Moore discloses that ohm meter 790 measures the resistance of the conductive layer 713 ([0055]); conductive layer 713 is an electrical resistance member as broadly cited in the claims.

Applicant argues that that Moore is silent regarding isolating an electrical resistance member within the conductive layer. However, these arguments are not commensurate in scope with the claim language.

As to the 112 rejection, applicant's arguments are not completely understood. The claims cite "and" not "or." Examiner was not objecting to the claim language "at least one of" – the objection was to the combination of "at least one of A, B and C" – which should read "at least one of A, B or C". *Gaubert* cites that in claim 1 "A rotor member made entirely or in part of one or several assembled pieces of iron, steel or any other magnetic material" the phrase "one or several pieces" means the same as "at least one piece". However, the claim still uses the alternative phrase "or" (iron, steel or any other magnetic material) not "and". However, in view of applicant's arguments and since one can understand the meanings intended of the claims despite their wordings, examiner withdraws the 112 rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
